Donald Vogler  
Jerry Vogler  
Allen Wells

## **ACKNOWLEDGMENT**

The Dawson County Extension Agriculture Committee would like to express its appreciation to all individuals, companies, and agencies that contributed to the demonstration program through the donation of time, knowledge, and material resources, without which the retrieval and publication of these results could not have been possible. Also, a special thanks to Lamesa Cotton Growers for their financial assistance in the program. Special appreciation and well-deserved recognition is extended to those listed below:

### **Result Demonstration Cooperators**

Bradley Boyd  
Johnny Ray Todd

Donald Vogler  
Mark Boardman  
Joe Raines

Donald Love  
Ricky Cude  
Raymond Witte

### **Dawson County Commissioners Court**

Sam Saleh, County Judge  
Jerry Beaty, Commissioner, Precinct 1  
Tino Morales, Commissioner, Precinct 2

Troy Howard, Commissioner, Precinct 3  
Foy O'Brien, Commissioner, Precinct 4

### **Cooperating Agencies**

**Farm Service Agency**  
Becki McIlwain, County Executive Director  
Wayne Sisson, Ag Credit Manager

**Natural Resources Conservation Service**  
Bill Finch, District Conservationist

Although most yields were obtained in the best possible way, chances for yield differences still exist, due to variations in irrigation, rainfall, land uniformity, and other factors. For this reason, the results of these field trials should not be interpreted too closely. Small differences in yield or other data should probably be regarded as insignificant. Occasionally, results occur in demonstrations that cannot be readily explained. Keep in mind that, even in replicated research tests, relatively large yield differences between varieties can occur without being statistically significant.

Trade names of commercial products used in this report are included only for better understanding and clarity. Reference to commercial products or trade names is made with the understanding that no discrimination is intended and no endorsement by the Texas Cooperative Extension is implied. Readers should realize that results from one experiment, or one year, do not represent conclusive evidence that the same response would occur where conditions vary.
