low	yields.		Green Hammer	TAM 115		*GW2032	low	yields.	
			TAM 114	Skydance					
				OK Corral					

***New Pick for 2022-2023.** ¶**Certified Seed Only (CSO).** Farmers must sign license agreement—they may not save their own seed for their next crop. †Soft red winter wheat.

Texas A&M AgriLife Extension, in collaboration with our wheat breeding program colleagues in Texas A&M AgriLife Research, offer these wheat varieties for producers. Wheat Picks are based on a minimum of three years of data (and at least two years for a ‘Watch List’ designation) over multiple locations. These wheat varieties are not strictly a list of recommended wheat grain varieties. But given the data, these are the wheat varieties we would choose to include on our farm. If you are planting other varieties, and you like them, continue to plant them. But consider trying one of these regional varieties on some of your acres, especially a variety that complements your other wheat variety’s maturity and insect/disease resistances.

For further information, view Texas A&M AgriLife wheat info. at <http://varietytesting.tamu.edu/wheat> or contact these individuals/Center websites:

- Texas Panhandle: Dr. Jourdan Bell, Extension agronomist, Amarillo, (806) 677-5600, jourdan.bell@ag.tamu.edu, <http://amarillo.tamu.edu>
